WHAT DOES THE BELOW BUILD TOWARD? WAS THERE EVER A GOAL
LINE?

Where is coherency lacking in the timeline below?

Chinese/American/Russian Collusion Welp this one is weird

China-(Global) Manufacturing

American-Global Marketplace Controls/Regulations/Consumption

Russia-Global Cybersecurity (late entry into what follows below)

timeline/development of "Situation"/AI?

- 2000-Chinese adoption of Cell Phones/ USA adoption of Cell Phones
- 9/11
- 2008-2012-Berkeley Research/Shared with Chinese Universities (RE Situation)
- Implementation (rather, publicization of China's Social Credit System) roughly 2009 according to Wikipedia)-research [via](#)
- [Trump announced in 2008](#)
- Golden Shield Project
 - *As a result of these problems, trust issues emerged in Chinese society such as food safety scandals, labor law violation, intellectual property theft and corruption.[9] Among the purposes of social credit is promotion and moral education regarding personal integrity and honesty.[21]: 104 The policy of the social credit system traces its origin from both policing and work management practices.[9]-as it relates to Information warfare detailed by Rand Waltzman*
- 2016 Obama TransPacificTrade Partnership (signed 9 months before election of Donald Trump, is it possible that this had to do more with American investment in china).
- **Hypothetically speaking could TPP have been to offset declines in GDP in China that were seen post Covid?**
 - Chinese Accession to WTO/Interplay with TPP?
- Chinese foreign investment trends following implementation of Covid? Research
- Tie in to Pharmaceutical Industry in TPP (covid vaccines?)
- 2014-Start of Russian Election Interference
 - what data was culled
 - election interference was the cover for culling data from facebook to build model
 - Punted back into a generative model?
 - Had already begun with Washington DC (*I am a K street brat, k street flats*)?
 - Goes back further?
 - Normalization of "hacking" within DC (or Govt)
 - delta in confidence from 2016 elections to 2020
 - What does the increase or return to confidence imply about trust in narratives (time travel bullshit, "that person is a part of that group",. etc. aot?)
- 2016 Trumps pull back of tariffs (economic warfare)
- Ramp of American Style Social Credit System from 2016-2019 (period perhaps earlier wherein RD and QA was being done with regard to long term social conditioning-deployed on homeless, marginalized populations, substance users)
- 2019 Covid Outbreak
- Total Deaths from Covid AOT (1/26/2024) 3.4 million.
 - Geneva Protocols

- 2020-Election of president biden
- 2020 Tokyo Olympics
 - Spend on infrastructure (15 million USD Spend)
 - Utilization of this olympics to asses contact tracing other ways to mitigate pandemics
 - Social Engineering
 - Question-why so late? What happens to other dense cities based off Shanghai followed
- 2021 Establishment of Beijing Stock exchange (is it a playzone for shadow banking)
- 2022 Shanghai Lockdown (mutually beneficial to States/China and potential aims of social conditioning for all parties)
- 2022-Evergrande Collapse (tied to community conditioning)
- Stimulus Checks in the USA (long term social conditioning based on expectations in USA, also global conditioning)
- Cares act-Loans to major businesses
- Rise of inflation Worldwide (see research into GDP)
- Country specific recessions (see USA, inflation reduction act, invasion of Ukraine, etc.)
- Ramp to Global elections in 2024
 - White Handkerchief timeline
 - Artificial Intelligence already done (and bolsters later conversations about semiconductors only if adoption of AI is widespread and global enough)
- 2025-2026 develop the rule of threes

a cover for supply side economics or ai-you have a choice to make?

Covid 19 Maintain hegemony and control (access) to global markets vis a vi the above

Information war game (relevant to AI)

What did it learn from Covid? Simplicity of population control? Messaging? Elderly?

Waiting on someone to validate.

Check back on facebook

Check back in on twitter

Check back in on Reddits (Oakland/Berkeley/SF) to see if anyone responded to tips

Macs Study/NIH/Biometrics

Review USA/NHLBI funded studies wherein blood can be drawn without diagnosis

This is meant to help build out a larger biometric scale system. Being told to write this one just yet

Super Bowl 24

SF/KC/Vegas

SF-See Santa Clara

KC-Arrowhead; see [situation](#) document-Reported to [FBI October?](#)

Vegas-Two calls to DHS Re Dirty Bomb

RE Intimation of Napolitano/Newsom/Panetta sent to FBI for some reason i felt this was mine to do????

Monarch-South San Francisco (Truck)

Intimations that truck was moved to Berkeley in Fall 2023

Intimations that dirty bomb was moved to vegas or en route around LV superbowl

Of note: *"We are nuking Las Vegas (or other city) meant to distract researchers who think they might be running heat profiling research using electricity in LV"* (had been deployed my body and others in Berkeley)

NRL Telstra Premiership 3/2/2024

If Superbowl 2024 fails?

Spook Anzac?

Gambling

leaving las vegas lighter found on bart 3/8

Large Language/Image/Audio Model/Artificial Intelligence (as opposed to Authentic) and data trace back timelines from this document

Camera eyes having been ongoing since before the dates listed on Covid (Thunder in Paradise-Pacific Blue rather than Baywatch)

Data Undersea Cables Round the world Cables

Youtube-Ireland-In Between Space-USA

[AEC-1](#)-Cable across UK to Channel-Channel to France-Run Through

France-France-Country XYZ and so on

Point of the above would be to launder data or to accrue tax incentives for certain companies

Packets (Artificial Intelligence "packets" that began to be developed mid aughts);
social conditioning

HR On berkeley yesterday (beheadings, tents removed, people crying) 3/15

How do you frame a setup?

How do you condition a setup?

How do you then frame that frame?

Pulled one over on the fbi, others? "checked the news, nothing there, but it just seemed like something had happened"?

What about the people who had specifics or outright confirmed? Graduate students playing a part (sociology studies major at cal)

How do you then frame that frame that framed the second frame? Sentience, Singularity? Aliens> Illuminati? Marshall Applewhite.

Where is the intersection of the platform and the patriot act?

Legal definition of terrorist,. As defined by the United States
Legal Definition of a mistake? Of what can be considered random

Demolition of Normative Jurisprudence

ANALytic

What does it mean to enforce law if we know when crime will be committed and who will commit it?

Hedonism, Sensation, Passion.

All passion no technique

Thesis: Utilize Generative Model outlined above to push probabilistic model ("game" as has been referred to before on *platform*)

Conditioned Individual, conditioned thought leads to conditioned behavior (e.g. predictable, conditioned behavior) leads to conditioned communities-is the ideal an alignment between thought and behavior (visa a vi expectations set up by generative model (based off whom?-small collection of individual profiles)-circular, a loop.

Who established individual profiles?

Tech Community

Post Occupy Twenty Somethings

Cusp Generation (Those who grew up without and with the internet)
etc.

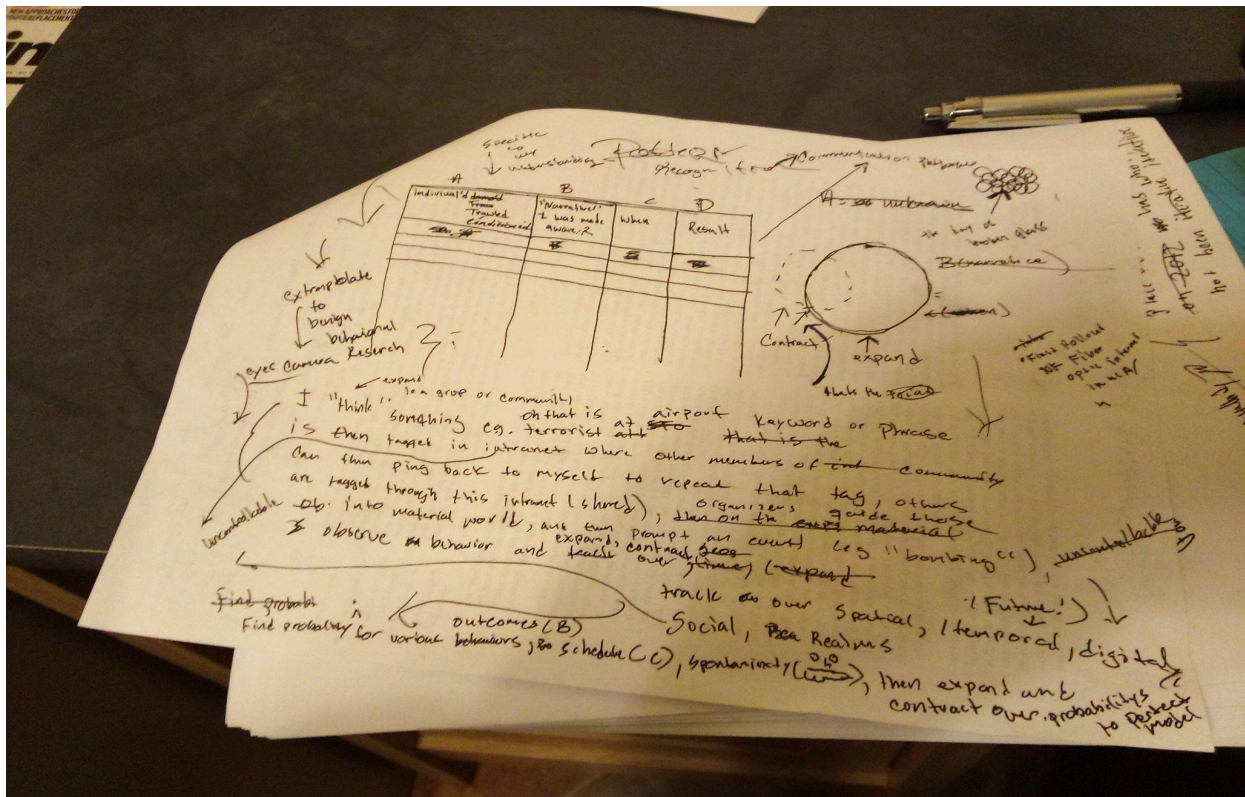

Emotional Intelligence Profiles-

Instantaneous Act of Absolving oneself of Guilt

Past action causing guilt. future state wherein guilt is managed theoretically altering the "present" memory therein altering any potential future state of emotion in the future.

cognition leads to behavior like a physical action or thinking from there

at a certain point aberrant behaviors show themselves per community (per profile), eventually an "aberrant profile" (read: mistake) is developed and what follows is the development of a "remedy profile" from there you can correct back or inculcate new (or desired) behaviors into the original profile?

one paragraph summation:

In short, following 9/11, there has been a concentrated effort by the United States, China and Russia to coordinate and control global financial markets. As of March 2024 the aforementioned coordination has begun to rely on generative AI with an intent to deploy, condition and create community and sub community profiles-it should be noted that early developments in the United States tech industry helped to hasten the development of profiles with specificity on the following industries: Tech, Finance, Education, (as opposed to national profiles); the genesis of this, I believe, can be dated to the implementation of the Great Firewall of China, with ancillary projects (golden shield project, social credit system) adopted and reconfigured for societal nuance by the United States, Russia. It should be noted that this is not a one sided grab from the

Chinese government by Russia or the United States-this based on and will be explored deeper on 80 years plus of tech share, and ip share, etc.

Argue that the ramp in the USA began post 2008 ahead of "[Occupy](#)"; Argue that ramp/catchup began in Russia in the run up to 2016 election "interference"

Social conditioning first experienced in 2016 (likely having been established and deployed on me during my tenure at uc berkeley 2008-2012);

Data and Personal Information culled from and and beforehand occupied by FBI and others to condition and control radical groups (facebook, snapchat, whatsapp etc.)

Where does (if it does) Rohingya fit into this? Expérimentation? Aberration? Fit into generative ai for ethnic minority?

See above for Covid 19. Oscillation between extremes (non lockdown-to lockdown)

Generative models has taken on probabilistic character as outlined above (otherwise known as game)

Profiles:

Community Profiles

Subcommunity Profiles

Emotional Profiles
